GUIDEWAY CONSTRUCTION BETWEEN OKEECHOBEE AND PALMETTO STATIONS

On Monday, February 2, 2004, a long-term roadway construction project on Okeechobee Road begins. This will affect Metrorail service between the Okeechobee and Palmetto stations.

As part of the construction project, portions of the Metrorail guideway above Okeechobee Road will be removed. The first phase of construction (to last about six months) calls for temporary removal of the Southbound guideway between the Okeechobee and Palmetto stations, followed by the second-phase removal of the northbound tracks. Construction will require single-tracking between these two stations.

A special, peak-hour shuttle train will operate between the Okeechobee and Palmetto stations every six minutes to provide easy connections during the construction period. Passengers will be required to exit the special shuttle train at Okeechobee station and board a regularly scheduled train. The shuttle train service hours are 6:50 AM-10:14 AM, and from 3:21 PM- 6:36 PM.
